

# Practical Solutions for Immediate Full Arch Restoration with Hands-On

Presented by: Carl Drago, DDS, MS

## COURSE DESCRIPTION:

Patients with debilitated dentition often seek rehabilitation to quickly regain their confidence and quality of life. Clinicians can offer a treatment solution for immediate full arch restoration to meet patient demands and expectations.

This program combines a didactic and hands-on segment to show participants a step-by-step, practical approach to deliver a provisional prosthesis on the day of implant placement. This course will also focus on the steps necessary to create and deliver the definitive prosthesis.

The hands-on portion of this course provides the clinician with the experience to perform the procedure on a model and have a clear understanding of the steps needed to fabricate an immediate and functional full arch provisional restoration. Participants of the hands-on activity will retain the model.

## COURSE OBJECTIVES:

At the completion of this course, participants should be able to:

- Identify patients who are candidates for immediate full arch restoration therapy
- Understand the preoperative steps necessary to plan for fabrication of an immediate full arch provisional restoration utilizing the DIEM® 2 Guidelines
- Properly plan for productive and cost-effective use of their time by reducing the number of appointments
- Understand the steps necessary to create and deliver the definitive prosthesis

BIOMET 3i is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. BIOMET 3i designates this activity for 7 continuing education credits. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at [www.ada.org/cerp](http://www.ada.org/cerp).
